# OPPORTUNITIES IN INCREASING LOCAL AGRICULTURAL AND AGRIFOOD PRODUCTION

Dr Roainah Rahman  
Department of Agriculture and Agrifood  
Ministry of Primary Resources and Tourism

## Opportunity 1:

Increase local crop production to achieve self-sufficiency through import substitution.

Example:

Crop	Local (MT)	Imported (MT)
Capsicum	0	401
Red chili	195	245
Thai chili	42	450
Spring onion	82	160
Tomato	82	1500

Data of local and imported crops in 2019.

## Opportunity 2:

Increase the production of livestock and crop products for supply as raw materials for value -added and processed products.

Example:

Commodity	Imported (MT)
Livestock	Chicken part (Wings)– 172 Whole chicken - 700
Crops*	Tapioca (Chips) – 27 Pisang Saba (Chips) – 22

\* Data of local and imported crops in 2020.

## Opportunity 3:

Increase local production to reduce dependency on imported processed products.

Example products:

Chicken frank , chicken nugget = 1,840 MT (Imported)

## Opportunity 4:

Increase local production through producing premium and high-value products to target for export market.

Example of premium crops - muskmelon, strawberry, passion fruit, salad

## Role of MPRT in supporting industries to increase production:

- Guide entrepreneurs to comply with market requirement
- Ensure consistent supply of agriculture inputs and raw materials
- Guide entrepreneurs to get capital from financial institutions to fund for modern technologies and mechanization
- Guide food entrepreneurs in the production of new value -added products (semi -finished products (semi -finished products) / nutraceutical supplements) for use in the food supply chain
- Technical advisory services on modern agricultural/processing technology and efficient techniques as well as production of products for food value chain supply
