**Kursus Asas Penanaman Sayur-Sayuran**  
**(Vegetable Cultivation Course)**

**Objective**

The main objective of this Course is to expose different types of planting techniques which include Open Field Cultivation and basic knowledge on Fertigation and Hydroponics.

This Course takes about a month which includes all the necessary cultural practices (From Sowing to Harvesting) of Vegetable Cultivation. The participant was engaged with both theoretical and Practical (Hands on) on the vegetable production and the management of the crops. Field visits are also done by giving the participant the real picture on how to operate and manage a farm.
