

## LIST OF BANNED INSECTICIDES

| NO | ACTIVE INGREDIENT(S) | CHEMICAL GROUP(S) | CLASS | TARGET CROP(S) AND ORGANISM(S)                                                                                                                           |
|----|----------------------|-------------------|-------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. | Aldrin               | Organochlorine    | -     | -                                                                                                                                                        |
| 2. | Chlordane            | Organochlorine    | II    | <b>LAND, HOUSEHOLDS:</b> <ul style="list-style-type: none"> <li>- Ants</li> <li>- Beetles</li> <li>- Termites</li> </ul>                                 |
| 3. | DDT                  | Organochlorine    | II    | *For mosquito vector control in eradication of malaria                                                                                                   |
| 4. | Dicrotophos          | Organophosphate   | I     | <b>COFFEE, PADDY, SUGARCANE, CITRUS, PALMS:</b> <ul style="list-style-type: none"> <li>- Chewing, sucking and boring insects</li> <li>- Mites</li> </ul> |
| 5. | Dieldrin             | Organochlorine    | -     | -                                                                                                                                                        |
| 6. | Dicofol              | Organochlorine    | III   | <b>ORNAMENTAL PLANTS, CUCUMBER, TOMATO:</b> <ul style="list-style-type: none"> <li>- <i>Tetranychus</i> sp. (Red spider mites)</li> </ul>                |
| 7. | Endosulfan           | Organochlorine    | II    | <b>FRUITS, VEGETABLES, ORNAMENTAL PLANTS:</b> <ul style="list-style-type: none"> <li>- Chewing, sucking and boring insects</li> <li>- Mites</li> </ul>   |
| 8. | Ethylene dibromide   | Fumigant          | Toxic | *For fumigation control of nematodes, wireworms and other soil pests; mills, warehouses and households                                                   |

## LIST OF BANNED INSECTICIDES

|     |                     |                 |    |                                                                                                                                                                                                                                                                                       |
|-----|---------------------|-----------------|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 9.  | Heptachlor          | Organochlorine  | II | *For ants and termites control                                                                                                                                                                                                                                                        |
| 10. | Lindane (Gamma-HCH) | Organochlorine  | II | <b>SOIL, SEEDS:</b> <ul style="list-style-type: none"> <li>- Aphids</li> <li>- Beetles</li> <li>- Flies</li> <li>- Thrips</li> </ul>                                                                                                                                                  |
| 11. | Methamidophos       | Organophosphate | Ia | <b>COCONUT:</b> <ul style="list-style-type: none"> <li>- <i>Cremastopsyche pendula</i>, <i>Mahasena corbetti</i>, <i>Metisa plana</i> (Bagworm)</li> <li>- <i>Setora nitens</i>, <i>Darna diducta</i>, <i>D.trima</i> (Nettle caterpillar)</li> <li>- <i>Thosea asigna</i></li> </ul> |
| 12. | Methidathion        | Organophosphate | Ib | <b>CITRUS, MAIZE, VEGETABLES:</b> <ul style="list-style-type: none"> <li>- Scale insects</li> <li>- Spider mites</li> </ul>                                                                                                                                                           |
| 13. | Methomyl            | Carbamate       | Ib | <b>VEGETABLES, ORNAMENTALS, SOYA BEANS, TOBACCO:</b> <ul style="list-style-type: none"> <li>- Chewing and sucking insects</li> <li>- Spider mites</li> </ul> <b>ANIMAL AND POULTRY HOUSES AND DAIRIES:</b> <ul style="list-style-type: none"> <li>- Flies</li> </ul>                  |
| 14. | Methyl bromide      | Fumigant        | II | *For fumigation control of pests in stored grains, soil, greenhouses and warehouses.                                                                                                                                                                                                  |
